# MyInsuranceInfo.com

QUICK. EASY. VERIFIED.

*Our insurance verification self-service portal was developed to simplify the consumer experience.
In a few easy steps, your consumers will be on their way to verifying coverage. In addition to a desktop,
consumers can also view and verify their insurance on any smartphone or tablet.*

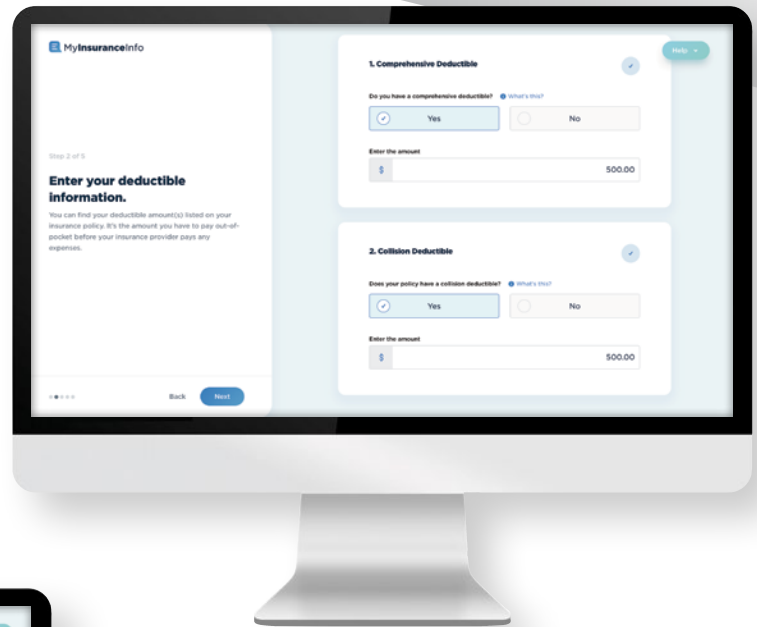

After entering their reference ID number, consumers will verify some personal account information before getting started.
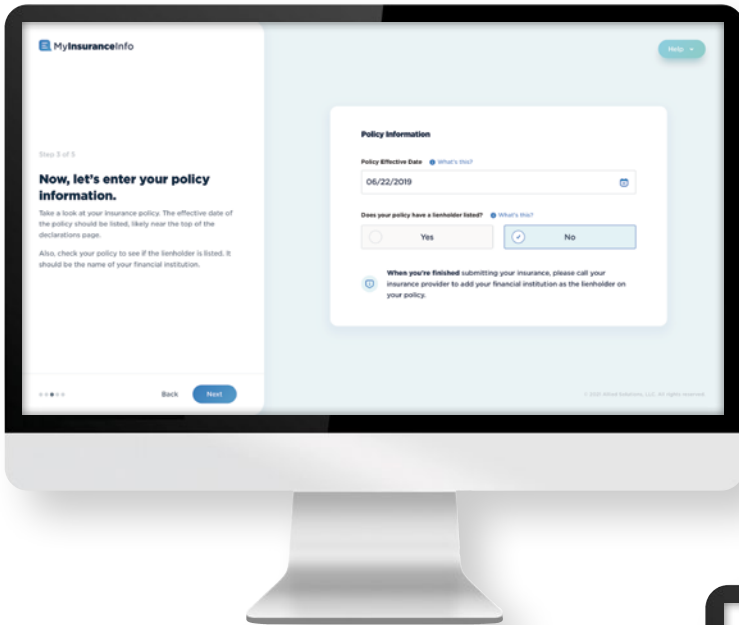

Consumers will answer a series of simple questions guided by helpful texts every step of the way.

Once they provide coverage information, consumers can upload proof of insurance digitally.

Contact information will be stored and made accessible as needed.

After reviewing and submitting their responses, consumers will be presented with a thank you page and an invitation to complete a brief survey to offer feedback on the verification process. A confirmation message will be sent to their email.
